SUMMARY

Software Engineer with full-stack experience across the MERN stack, focused on building and maintaining scalable, production-grade applications. Comfortable owning features end-to-end — from API integration to performance and deployment — and collaborating across teams to ship software real users rely on.

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER - MERN STACK

E26 Media Production PVT LTD — Jan 2026 - Oct 2026, Mangaluru, India

Reason for Leaving: Company discontinued software development services.

- Developed an MERN-stack LMS website, delivering core features and improving application performance
- Built application features and REST APIs, resolving issues to improve system reliability.
- Assisted junior developers and interns with tasks, debugging, code reviews and technical guidance.

SOFTWARE ENGINEER - MERN STACK

Emproto Technologies PVT LTD — Jan 2024 - Dec 2024, Bengaluru, India

Reason for Leaving: company shutdown

- Built full MERN applications with React.js, Node.js, Express.js and MongoDB for real-estate platforms.
- Developed 10+ reusable React/TypeScript components and REST APIs, improving application scalability.
- Integrated APIs with Axios and Redux, reducing API-related failures by 15%.
- Implemented MongoDB operations, authentication and form validation, reducing user input errors by 25%.

FULL STACK DEVELOPER - CORE PHP

Vinyasa Tech Solutions — Jan 2023 - Jan 2024, Mangaluru, India

Reason for Leaving: Tech stack restricted to core PHP (no React, TypeScript, or Node.js used).

- Led development of multiple web applications, reducing bugs by 30% through efficient debugging.
- Managed deployment and maintenance of websites, maintaining 99% uptime.
- Resolved technical issues and optimized code, improving application performance by 40%

PYTHON WEB DEVELOPER - INTERNSHIP

Codelab Systems — Nov 2021 - Apr 2022, Mangaluru, India

- Built a full-stack app with Django and PostgreSQL, optimizing data retrieval by 30%.
- Developed RESTful APIs with Django Rest Framework, reducing API response time by 25%.
- Implemented auth, DTL, and server-side rendering to boost SEO and performance.
